EDUCATION

Dr. B.R. Ambedkar National Institute of Technology, Jalandhar
Bachelor of Technology in Computer Science and Engineering

Aug 2023 – Expected June 2027
CGPA: 8.53 / 10 | **Top 4%ile**

TECHNICAL SKILLS

- **Languages:** C++, Python, C, JavaScript
- **Core Fundamentals:** Data Structures & Algorithms, System Design, Concurrency, Object-Oriented Programming, DBMS, Computer Networks, Operating Systems
- **Libraries & Frameworks:** Node.js, Express.js, FastAPI, React.js, Scikit-learn, Pandas, SMOTE
- **Databases & Tools:** MongoDB, MySQL, Git, GitHub, REST APIs, WebSockets, JWT, Postman

EXPERIENCE

Software Development Engineer Intern

Jun 2026 – Jul 2026

| *Accenture, Bengaluru*

- Architected automated document intelligence solutions on SAP BTP to drive enterprise GenAI initiatives.
- Reduced manual search time by **45%** by building **ContextIQ**, a high-performance RAG-based Q&A microservice.

Software Development & CP Core Team Co-Lead

Dec 2023 – Present

| *Google Developer Group, NIT Jalandhar*

- Boosted contest performance by **40%** and junior participation by **30%** by directing algorithmic training and mock interviews.
- Designed scalable evaluation environments for **70+** concurrent participants across campus contests and co-led technical operations for Hackmol 6.0 (**150+** teams).

PROJECTS

SwiftCache – Thread-Safe Concurrent LRU Cache Server

May 2026 – Jun 2026

C++, TCP/HTTP, Concurrency

[GitHub](#)

- Achieved deterministic **O(1)** operations by engineering a concurrent LRU cache server over TCP/HTTP utilizing a custom hash map, doubly linked list, and TTL key expiry.
- Enabled seamless integration and self-serve modifications for embedded caching requirements by designing a highly modular architecture.
- Maintained high availability at **15,000+ QPS** with **3ms** p99 latency by developing a custom benchmarking harness to optimize concurrent read/write throughput.

ChatMind – Real-Time Messaging Platform with RAG Q&A

Mar 2026 – May 2026

MERN, FastAPI, WebSockets

[Live Demo](#) | [GitHub](#)

- Optimized end-to-end delivery latency by **20%** (**50ms**) by architecting a real-time messaging system utilizing WebSocket concurrency over HTTPS.
- Managed dynamic context windows by integrating a RAG summarization layer that fuses hybrid BM25 and vector retrieval via Reciprocal Rank Fusion (RRF).
- Improved context relevance scores (MRR@5) by **35%** by deploying cross-encoder reranking to ensure intelligent user interactions.

RetainOps – Telecom Customer Churn Prediction Engine

Jan 2026 – Feb 2026

Python, Scikit-learn, SMOTE

[GitHub](#)

- Extracted actionable business insights for customer retention by developing a predictive engine analyzing **7,000+** transaction records.
- Captured **60.7%** of revenue-at-risk in the top 20% cohort and achieved a **0.66** MMS by extracting **9** domain-specific features and mitigating class imbalance via SMOTE.
- Selected an optimal production model for automated operations by benchmarking **5** tuned classifiers using Stratified K-Fold cross-validation.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

Profiles: [Codeforces \(Adree\)](#) | [LeetCode \(Aditya_chauhan_\)](#) | [GeeksforGeeks](#) | [CodeChef](#)

- **Meta HackerCup:** Secured Global Rank **3223** (All-India Rank **875**) in Round 1; qualified for Round 2.
- **LeetCode:** Achieved Global Rank **315** (Top **1.5%**) in Biweekly Contest 172. Reached **Knight** (Max Rating: **1957**).
- **Codeforces & CodeChef:** **Specialist** on Codeforces (Max Rating: **1418**) | **3-star** on CodeChef (Max Rating: **1661**).
- **Flipkart Grid 7.0:** Ranked as a **Semi-Finalist** out of **1.5 lakh+** participants, placing in the top **0.5%** in India.
- **Milestones:** Solved **1,200+** algorithmic challenges across major platforms; secured **3rd** place out of **120+** peers in CodeStorms 2024.
